- Website Design & Development - WordPress, Divi, Wix.
- E-Commerce Shops - Shopify.
- Lead on average 2 meetings per week with high-end clients to plan strategically and creatively on how to build and design their website.

Web Development Projects

GIGGLEBYTES / TEAM, 5 days | https://github.com/skaiser33/sei_project2

May 28th 2021

- Full-stack application that allows logged-in users to view a list of jokes by a particular comedian or topic. This app features full user authentication and allows for the user to create an account for a unique email, login securely, update passwords, and delete an account.

MOOVIE WIZ / SOLO, 4 days | https://github.com/JacobRishe/API_APP

Apr. 4th 2021

- Created an app that fetches data from an external API through the use of interpolation.

POTO | SOLO, 7 days | <https://github.com/JacobRishe/Poto-Frontend>

July 7th 2021

- Full-stack application using the MERN stack. PoTo allows logged-in users to view a list of polls created by other users, and then give their opinion by clicking the yes or no button. The logged-in user can also create their own poll to allow others to cast their opinion on their question as well.

WAYFARER / TEAM, 5 days | <https://wayfarer-sei.herokuapp.com>

June 5th 2021

- Full-stack application that allows users to log-in and post reviews about their travel adventures. As the user signs up for an account, it will greet the user by name along with the current city he/she is in.
